

MANAGED FIREWALL

Today's Security Solution Customized To Your Needs

Ransomware. Phishing. Viruses. Hacks. Stay ahead of evolving security threats with Frontier Managed Firewall. Protect your organization's most important digital assets, safeguard business continuity, and take network security to the next level so you can focus on what matters: your business's success.

MANAGED FIREWALL									
FIREWALL			GATEWAY A/V			INTRUSION PREVENTION		TRAFFIC FILTERING	
Application Control	Stateful Firewall	IPSec VPN	Anti-malware	Antispam	Content Disarm & Reconstruction	Intrusion Prevention System	Botnet Protection	DNS Filtering	Web Content / URL Filtering

How Does Managed Firewall Benefit Your Business?

Outsourcing firewall management doesn't mean giving up control. With 100% visibility under a single pane of glass, you can oversee your network while our experts monitor security in real time.

- Optimize your network's performance and security posture
- Create and implement network policies to protect your business
- Stay up-to-date on latest security patches
- Safeguard against the costs of a breach

Why Choose Frontier Managed Firewall?

Expert-Designed Solution

Get a customized security solution designed by experts. We'll assess your current security posture, help you define your custom policies, and configure and implement your solution with best practices.

Your Trusted Network Security Advisor

Frontier's technical experts can help you identify potential vulnerabilities in your network and develop a security strategy to support your business initiatives.

Improved Security Posture

Don't just focus on thwarting network threats. Frontier Managed Firewall protects your business before, during and after an attack, safeguarding your business like it's our own.

Your Solution, Your Choice

Let us help you mix and match service plans with different hardware configurations to build a solution that meets your needs at every site.
