

FRONTIER

FORMULA FOR INFINITE PROGRESS

If you're balancing separate data and voice networks and vendors, it's an equation for frustration

Internet slowdowns erode call quality:

100%

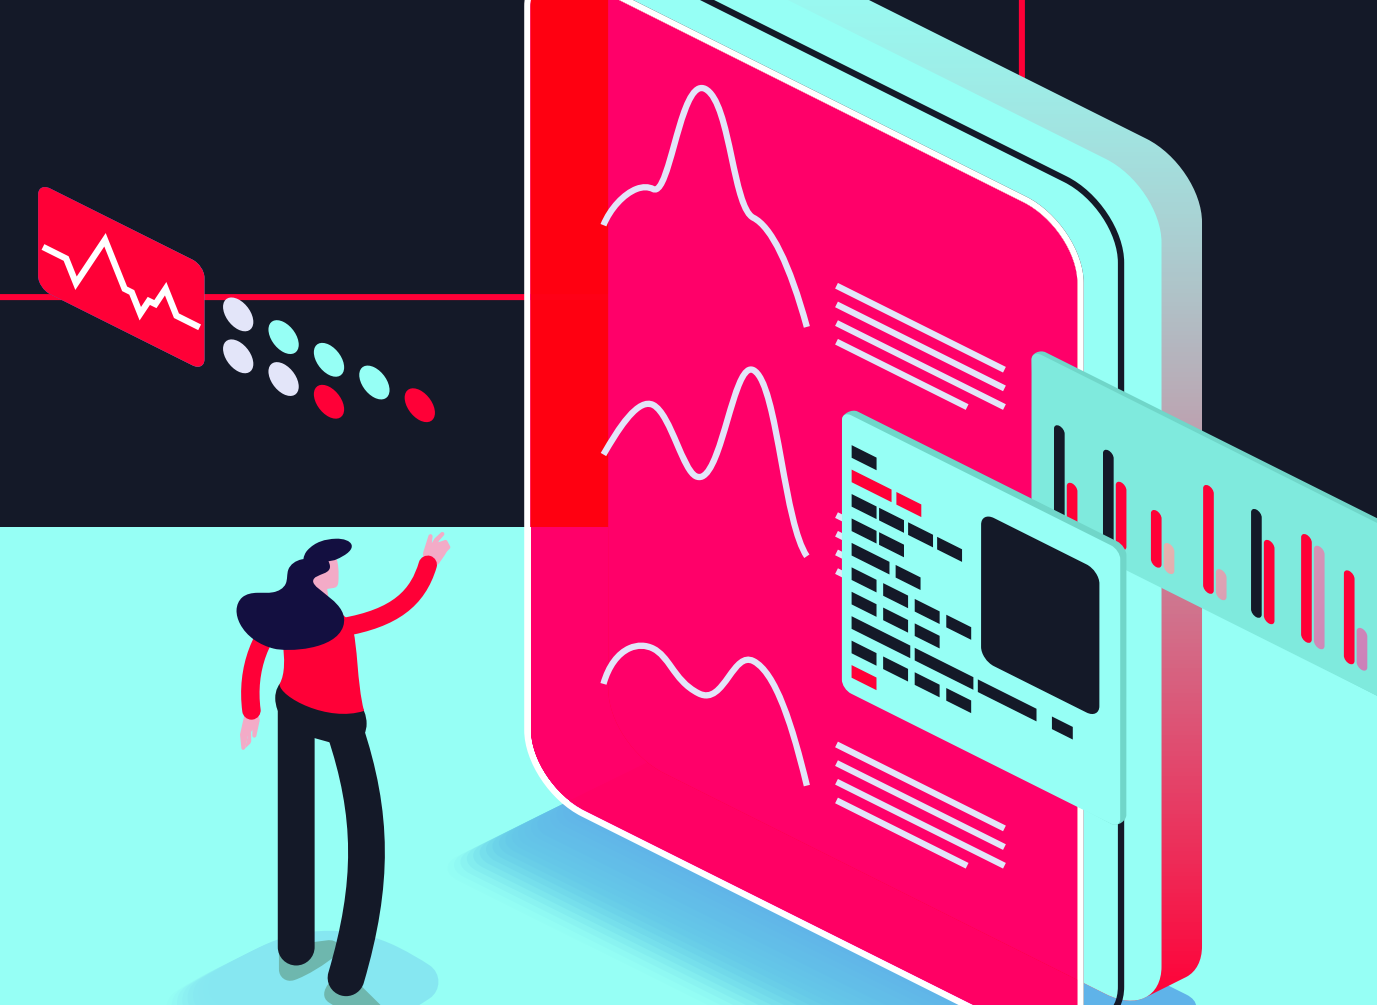

of VoIP is dependent on internet speed & reliability.

Unified Communications systems save

24%

on IT spending.

Get peace of mind with Dedicated Internet Access to keep your customers and your employees online and productive all at the same time.

Sharing bandwidth lowers performance: you'll likely never get

100%

of max speed.

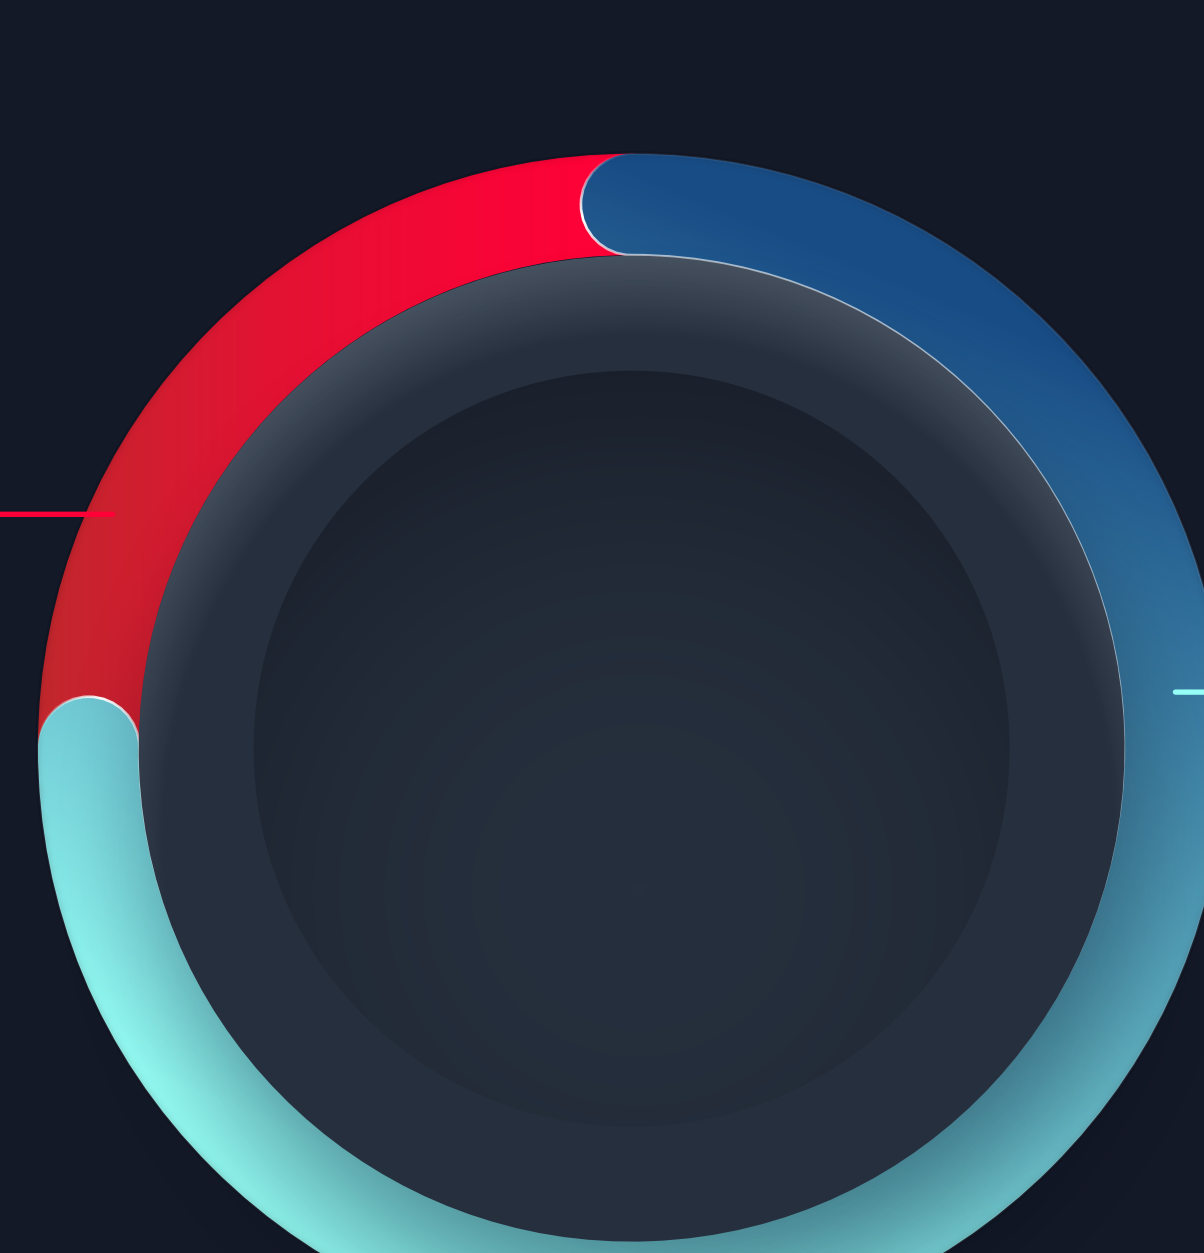

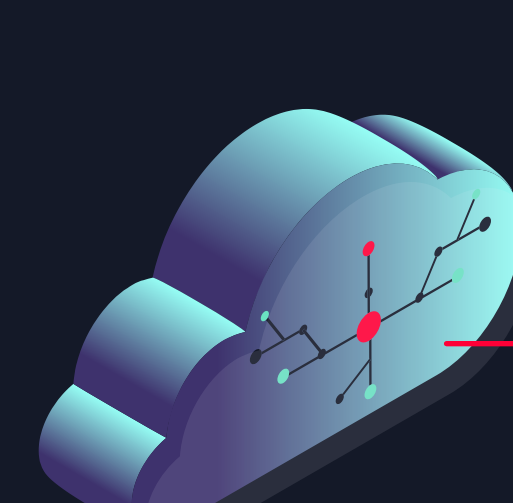

Managing multiple UC vendors can create operational challenges for IT and usability challenges for employees.

48%

of organizations use multiple UC providers, creating inefficiencies and usability challenges.

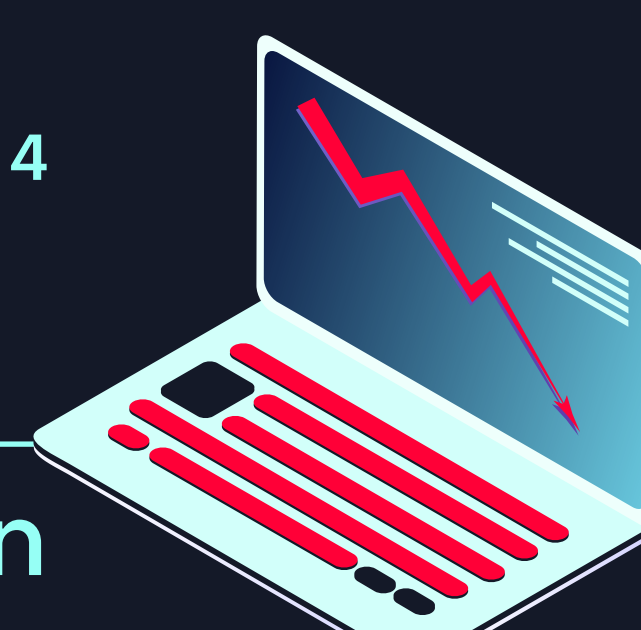

Adopting cloud-based UC increases employee productivity by

23%

80%

of productivity can be lost when switching between applications

The solution is as simple as 1 + 1

Add data and voice networks together.
Subtract downtime and inefficiency.

FRONTIER DEDICATED INTERNET ACCESS

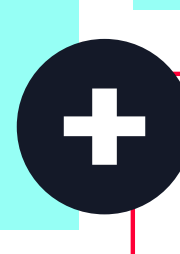

VoIP quality of service routing
